

PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

DIPLOMA IN ELECTRONIC ENGINEERING (COMMUNICATION)

The Diploma in Electronic Engineering (Communication) programme should produce balanced and competent technical workers who are:

PEO1. Practicing technician in electrical engineering related field

PEO2. Contributing to society with professional ethic and responsibilities

PEO3. Engaging in enterprising activities that apply engineering knowledge and technical skills

PEO4. Engaging in activities to enhance knowledge for successful career advancement

PROGRAMME LEARNING OUTCOMES (PLO)

DIPLOMA IN ELECTRONIC ENGINEERING (COMMUNICATION)

Upon completion of the programme, students should be able to:

PLO1 : Apply knowledge of applied mathematics, applied science, engineering fundamentals and an engineering specialisation as specified in DK1 to DK4 respectively to wide practical procedures and practices.

PLO2 : Identify and analyse well-defined engineering problems reaching substantiated conclusions using codified methods of analysis specific to their field of activity (DK1 TO DK4).

PLO3 : Design solutions for well-defined technical problems and assist with the design of systems, components or processes to meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations (DK5).

PLO4 : Conduct investigations of well-defined problems; locate and search relevant codes and catalogues, conduct standard test and measurements.

PLO5 : Apply appropriate techniques, resources, and modern engineering and IT tools to well-defined engineering problems, with an awareness of the limitations (DK6).

PLO6 : Demonstrate knowledge of the societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering technician practice and solutions to well-defined engineering problems (DK7).

PLO7 : Understand and evaluate the sustainability and impact of engineering technician work in the solution of well-defined engineering problems in societal and environmental contexts (DK7).

PLO8 : Understand and commit to professional ethics and responsibilities and norms of technician practice.

PLO9 : Function effectively as an individual, and as a member in diverse technical teams.

PLO10 : Communicate effectively on well-defined engineering activities with the engineering community and with society at large, by being able to comprehend the work of others, document their own works, and give and receive clear instructions.

PLO11 : Demonstrate knowledge and understanding of engineering management principles and apply these to one's own work, as a member or leader in a technical team and to manage projects in multidisciplinary environments.

PLO12 : Recognise the need for, and have the ability to engage in independent updating in the context of specialised technical knowledge.
