CNC Milling Machine Basic Programming

Course Description:
This course will be implemented by using practical exercises and tutorials besides lectures to instill the correct approach to real world CNC application. The following content will be covered.

Course Content:

- Introduction to CNC milling machine
- Manual machining
- Introduction to CNC code
- CNC Milling programming techniques
- Exercise
- Install and editing programming
- Setup workpiece/tool
- Testcut

Duration:
3 Days

Fees:
RM 700 / person
Minimum participant 10 person
